FROM: Mayor Ted Husa

DATE: January 17, 2008

RE: Public Health and Safety Advisory Board Mission Statement

Dear Safety and Public Health Volunteers,

Welcome to the newest Mayor's advisory board. You will find great fulfillment in serving the people of Denville in a volunteer capacity. Every one of you has stepped forward unsolicited to give of your time and talents to your neighbors and fellow citizens. That already is a formula for success. Each new member listed below has a particular skill or experience that makes them well suited for this Advisory Board.

The mission of this Board is very simple. We seek anything in our environment that is detrimental to life in general. Our task is to identify one item per month, draw awareness to the hazard through education and use our time, talent and influence to combat those things. They may be health hazards. They may be environmental hazards. They may be safety issues. The hazard may involve invasive plants, high cholesterol, unsafe public places, pollution, flood prevention, effects of EMP emissions, bike safety, lyme disease, rare diseases, household hazards or whatever members of the Board feel is important.

We operate with the support and in cooperation with the Denville Health Department, the Denville Local Emergency Management Council and Denville Social Services. We want to focus on timely issues of great relevance to the public. Our members are highly qualified individuals in their respective fields. From my discussion with all members I can say we all take public health and safety very seriously. At our meetings we plan to prioritize our monthly issues and present an awareness event that will be of great benefit to the public.
